DAMAGE-FREE FILLING

The Tolsma-Grisnich retractable fall breaker (folding chute) is a unique and proven concept for filling lorries, bunkers, boxes and big bags without damaging the product. It can be used for potatoes, onions, shallots, carrots, etc. Our standard fall breaker is equipped with a hopper, eight fall breaker flaps made of plastic fabric and a hoist motor. The flaps are operated by means of a hoist motor with hoist straps. Tolsma-Grisnich's retractable fall breaker is characterised by its simplicity and flexibility.

THREE MODELS

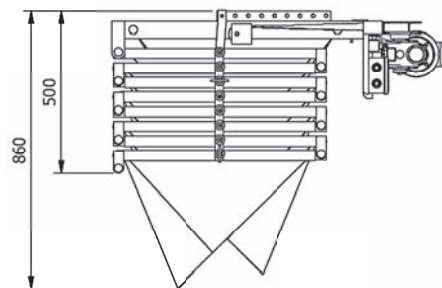

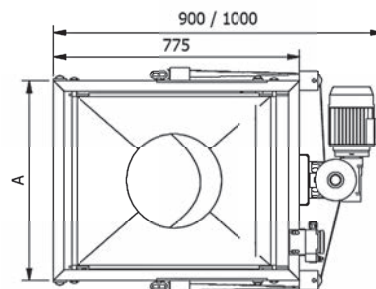

The Tolsma-Grisnich fall breaker is available in three models, VC40, VC60 and VC80. Many options are possible, which means that the fall breaker can be customised to suit the user's requirements.

FALL BREAKER VC40/ VC60/ VC80

Technical details	VC40	VC60	VC80
Width hopper - A (mm)	430	630	830
Length unfolded	2,495	2,495	2,875
Capacity (ton/hour)	15	30	50

OPTIONS

- More or less flaps depending on the height to be bridged
- Hopper manufactured from rubber for greater durability
- Flap fabric with rubber stitched on to it
- Automatic model (product sensor, end switch set and control box)
- Conveyor switch, to stop supply conveyor
- Interim signalling with detachable switch
- Supply cable and cable between fall breaker and control box
- Frame manufactured from stainless steel

Subject to changes in construction and implementation and printing errors.
